Julie,

Please see Chuck's message below. I agree. Use the 366 for now and we will get you access to the database as soon as possible.

Annette W. Fields, Ph.D.

Subject: database issues

The database is locked. I can see it displayed on the map but can't download the raw data file. Tetra Tech is working on freeing it up. I'll have it tonight and should be able to give you that number in the morning. But if we're going with 366, we'll be good regardless.

Thanks,

Chuck Berry

On-Scene Coordinator

EPA R4 Superfund
